

Rate 7 – Cogeneration (Transport) and/or Rate 9 – Large Commercial/Industrial

Customer Activity:

Request for a new gas service.

Request plumbing permit for installation of customer gas house-line.

If gas pressure requirements are greater than standard (inches of water column), then an elevated gas pressure permit is required.

Schedule and be available for onsite visit by Long Beach Gas & Oil, Engineering to “size the meter”, layout initial service line routing and discuss fees.

Schedule and be available for onsite visit by Planning & Building for plumbing permit review.

Discuss placement of telephone line for Electronic Metering Equipment with Gas Services. Customer to provide telephone number after line is installed. Electronic Metering Equipment fee is required in advance.

Discuss deposit requirements with Gas & Oil, Business Operations.

Review required fees and verify payment.

Schedule onsite visit to set gas meter and electronic metering index.
